TEST REPORT

Reg. No. : 21100706582 Reg. Date : 08-Nov-2022 00:15 Ref.No : Approved On : 08-Nov-2022 15:14
 Name : PATELHIRENKUMAR PRAMODBHAI Collected On : 08-Nov-2022 00:15
 Age : Gender: Male Pass. No. : Dispatch At :
 Ref. By : Tele No. :
 Location : SHREEJI CLINICAL LABORATORY @ KIM

Test Name	Results	Units	Bio. Ref. Interval
ANTI HBs	93.96	mIU/mL	≥ 10 (Indicate Presence of antibody)

CMIA

Sample Type: Serum

Useful for monitoring serum anti-hepatitis B surface (anti-HBs) levels after vaccination specially in health care workers or during intravenous or intramuscular hepatitis B immune globulin (HBIG) therapy to prevent hepatitis B virus (HBV) reinfection in liver transplant recipients with known previous chronic HBV. Individuals who have received blood component therapies (eg, whole blood), plasma, or intravenous immunoglobulin infusion in the previous 3 to 6 months may have false-positive anti-HBs results due to passive transfer of anti-HBs present in these products.

----- End Of Report -----

Test done from collected sample.

This is an electronically authenticated report.
